

GRUNNEGER

POWER

Grunneger Power: energy from Groningen, for Groningen

Gül has solar panels

Grunneger Power is Gül. She has solar panels on the roof of her rented house.

Grunneger Power is our Leon. He promotes renewable energy.

Grunneger Power is Jack. He bought solar panels on the communal solar panel roof in his neighbourhood, the Zeeheldenbuurt.

Gül, Leon and Jack are part of Grunneger Power. At Grunneger Power we want to do things differently; we want to be in charge of our own energy. We are the largest renewable energy co-operative in Groningen and one of the largest in The Netherlands. Energy is generated by people in Groningen, for people in Groningen. Together we are Grunneger Power!

Grunneger Power wants to make sure that everybody can participate in making Groningen 100% sustainable. We help you to save, generate, and use renewable energy and this is how we invest in a sustainable Groningen and a better world: we take control of our own energy generation again, and make it greener!

Along with our utility company “Noordelijk Lokaal Duurzaam” (translated as the “Northern Locally Sustainable Company”) we generate and sell local green energy. When you [take out an energy contract](#) from Noordelijk Lokaal Duurzaam, you buy electricity from Groningen and CO2-compensated gas. The revenue will in turn be re-invested in sustainable local projects. This is how we make our surrounding area green and future-proof.

I WANT ENERGY FROM GRUNNEGER POWER

Do you want to generate or save energy yourself, but you don't have a suitable roof? Do you rent your home? No problem; with Grunneger Power everyone can join in. Just like Nynke from the Schildersbuurt, you can buy solar panels on a community solar panel roof for the neighbourhood. Or you can save energy together with your neighbours, just like Thomas from the Noorderplantsoenbuurt is doing. Because of his hybrid heat pump, his monthly gas bill is much lower than before.

Our newest and largest project is our [Zonnepark Vierverlaten](#). There are 7,777 solar panels in this park located just outside the city of Groningen. By investing in only one solar panel, you can already contribute to a better world. And instead of putting your money in a savings account, you can use it to make a sustainable financial investment.

By generating our own power, we are taking steps towards a transition to green energy. By acting together we move forward, and we have more Grunneger Power. Grunneger Power is a co-operative consisting of people like you. We don't just think, we also act. Because we need to act now.

If you want us to be your utility company or if you want more information, you are welcome to visit us in our store in the [Oude Boteringestraat 68](#) in Groningen. You can also reach us by sending an e-mail to info@grunnegerpower.nl or by calling us on 050 82 00 492.
